- English-B2 (Professional working proficiency

PROFILE

I am a final-year Computer Science and Engineering student with a strong background in web development, programming, and design. I have hands-on experience with HTML, CSS, JavaScript, C#, SQL, and Python, as well as expertise in WordPress and design tools like Adobe Photoshop and Figma. Additionally, I hold certifications in Big Data Analytics, Web Application Development, and UX/UI Design. Along with technical skills, I have experience in social media management and digital marketing. I'm passionate about combining my technical and creative skills to develop innovative solutions and enhance user experiences. Currently, I am seeking opportunities to contribute to impactful projects and grow as a developer and designer.

EDUCATION

Bachelor of Computer Science and Engineering 2022-Present
University of Mitrovica "Isa Boletini"

PROJECTS

HIKE SAFE WEATHER   DEC 2023 - JAN 2024

Hike Safe Weather" project likely aims to improve the safety of hikers by addressing challenges associated with weather conditions. By providing accurate and timely weather information, promoting awareness, and offering guidance on safe practices, the project seeks to enhance the overall hiking experience and reduce the risks associated with adverse weather

Technologies Used: FIGMA

BIG TECH   MARCH 2024

This project showcases a modern and functional UI/UX design for Big Tech, an e-commerce platform specializing in the sale of technology devices. The main focus was to create an intuitive and visually appealing user experience, ensuring seamless navigation, efficient product organization, and a fast checkout process. The design is fully optimized for all devices and reflects the visual identity of an innovative brand in the technology industry.

Technologies Used: FIGMA

CALCULATOR   MARCH 2023

A simple and responsive calculator built with HTML, CSS, and JavaScript, supporting basic arithmetic operations with a clean and interactive UI.

Technologies Used: HTML, CSS JAVASCRIPT

LIBRARY MANAGEMENT SYSTEM   JAN 2025 - FEB 2025

Designed and developed a C# and SQL-based system for managing library books and user borrowing. Implemented database normalization and optimized queries for fast retrieval of data.

Technologies Used: C#, SQL

MUR Workshop   NOV 2022- JAN 2023

A modern and responsive architecture website showcasing MUR Workshop's projects, services, and portfolio with a clean and visually appealing design.

Technologies Used: HTML, CSS, JS, Bootstrap

FIVESTAR FITNESS   OCT 2024

A fully responsive WordPress website for FiveStar Fitness, featuring an e-commerce store, a fitness blog, and essential pages . Designed for a seamless user experience with a modern and engaging layout.

Technologies Used: WordPress

RECIPE FINDER   NOV 2024

A mobile Recipe Finder app allowing users to search for recipes based on ingredients or categories. Features include a dynamic search, step-by-step instructions, and a favorites section for saved recipes. Designed for a smooth and intuitive user experience.

Technologies Used: React Native

Programming Tutorial Platform   JAN 2025 - FEB 2025

A mobile learning app built offering interactive programming tutorials for all skill levels. Features include video lessons, coding exercises, quizzes, and progress tracking, providing a seamless and engaging learning experience on the go.

Technologies Used: React Native
